## Gloves

Gloves are an effective way to protect hands and wrists from cuts, abrasions, burns and irritants. Selecting the appropriate hand protection is critical in the work environment. Gloves should be replaced periodically, as their condition deteriorates.

Apprentices should consider the most appropriate glove to wear as part of completing a risk assessment checklist (RAC) for the task they are about to commence. Apprentices should be aware of the EN388 Cut resistance rating system when selecting gloves not issued by EGT.

## Safety Glasses & Goggles

EGT supplies Safety glasses (clear and smoke) and Safety goggles. Replacement glasses are available from your field officer or the uniform shop. Prescription eyewear users may request **Crisp 820 safety glasses** designed to fit over prescription glasses or can be reimbursed for prescription safety glasses as per the section below.
